PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer & Data Analyst** with over 2 years of experience designing, building, and deploying end-to-end logistics applications, data automation workflows, and analytical dashboards. Skilled in **React, Python, Node.js, SQL, and APIs**, with proven expertise in transforming complex operational data into actionable insights and automated systems for fleet tracking, warehouse management, and trip dispatching.

WORK EXPERIENCE

Great Sierra Development Corporation - *Senior Power Apps & Full-Stack Developer*

June 2024 – Present (Rendering)

- Designed, developed, and maintained full-stack web applications for logistics management, including trip dispatching, warehouse control, and driver payroll systems.
- Built dynamic, trend-focused analytics dashboards to provide actionable business intelligence and operational oversight.
- Developed automated data pipelines using **Power Automate** and **Python** to streamline data processing across multiple platforms.
- Built custom data gateways and integrated multi-platform REST APIs, including **Google Maps API, ManilaGPS, MyGeotab**, and Microsoft Graph API to support real-time trucking tracking maps.
- Developed custom web scrapers in **Python** to extract and ingest GPS data from partner systems lacking native API integrations.
- Utilized **Microsoft Power Code Apps (React frontend)**, **Microsoft SQL Server 2019**, and Microsoft cloud services for backend data management and infrastructure.

Amazon - Amazon Flex Driver Support

September 2021 – January 2022

- Provided real-time operational and technical support for Amazon delivery drivers across the United States.
- Handled time-sensitive logistical updates, including order cancellations, route adjustments, driver payments, and location mapping.
- Diagnosed technical software issues with the driver platform to ensure seamless delivery execution.

CORE COMPETENCIES & SKILLS

- **Data Analytics & Automation:** Trend Analysis, Analytical Dashboards, Data Automation, Web Scraping (Python)
- **Frontend Development:** React, TypeScript, JavaScript, HTML5, CSS3
- **Backend & Frameworks:** Node.js, Python (Django), Microsoft Power Apps SDK/CLI
- **Database & APIs:** Microsoft SQL Server 2019, Microsoft On-Premise Data Gateway, Microsoft Dataverse, REST APIs, Microsoft Graph API, Google Maps API, ManilaGPS API, MyGeotab API.
- **CI/CD:** Github
- **Development Tools & IDE:** Power Automate, Microsoft Power Apps CLI, npm, Custom Devkit CLI, VS Code, Antigravity

EDUCATION

Santa Isabel College Manila

Bachelor of Science in Information Technology (3rd Year Completed) — **May 2021**

Santa Isabel College Manila

Senior High School Diploma – STEM Track — **April 2018**

Cayetano Arellano High School

High School Diploma — **May 2016**

LANGUAGES

- **English** (Proficient)
- **Tagalog** (Native)
